LOGISIGHT 권역 인텔리전스

2026-W26

종합

이번 주 동남아·남아시아 권역은 물류 네트워크 확장과 지속가능성 정책이 두드러졌다. 베트남항공이 한국 화물 시장 공략을 위해 ECS 그룹을 GSA로 선정했으며, 싱가포르의 글로벌 물류 행사 유치를 통해 허브 지위를 강화했다. 인도는 항공유의 친환경 전환을 추진하는 한편, 저가 물류 모델이 방글라데시에서 성과를 내고 있다.

싱가포르는 TIACA 집행 서밋 2027 유치와 함께 해운 포럼 'Splash Singapore'를 개최하며 물류 허브로서의 입지를 공고히 했다. 이는 싱가포르 항만과 공항의 환적 경쟁력 유지 전략의 일환으로 풀이되며, 향후 디지털화·친환경 물류 논의가 활발해질 전망이다. CEVA 물류는 말레이시아 데이터센터 건설을 지원하며 아태 지역 AI 인프라 수요에 대응하고 있다.

인도는 지속가능항공유(SAF) 생산 확대를 목표로 2027년 파리 에어쇼까지 규제·인센티브 체계를 마련할 계획이다. 이는 글로벌 항공 탄소 감축 압력에 대응함과 동시에 자국 정유·바이오 연료 산업 육성을 위한 움직임으로 보인다. 베트남항공의 한국 GSA 선정은 동남아 항공사들이 주요 교역국과의 직결 화물망을 강화하는 추세를 반영한다.

방글라데시에서는 메드로그가 다카 터미널에 저가 바지선 모델을 도입해 내륙 수운 물류의 경쟁력을 높였다. 이는 도로 의존도를 낮추고 비용 절감을 이끌어낸 사례로, 남아시아 내륙 물류의 모범 사례로 주목된다. CEVA 물류의 사업 확장은 아태 지역 데이터센터 구축 물동량 증가와 연계되어, 전자상거래·클라우드 수요 확대가 물류 시장을 견인하고 있음을 시사한다.

전반적으로 이번 주 동남아·남아시아 권역은 인프라 투자와 지속가능성 정책이 물류 효율성과 연결되는 흐름을 보였다. 싱가포르의 허브 지위 유지 노력, 인도의 SAF 도전, 베트남의 한국 시장 진출 등은 각국이 글로벌 물류·교역 환경 변화에 대응하는 전략의 일환이다. 앞으로도 이 권역은 생산기지와 환적 허브로서의 역할을 더욱 강화할 전망이며, 특히 친환경 물류와 디지털 전환 속도가 관전 포인트가 될 것이다.

베트남항공이 한국에서 ECS 그룹을 화물 GSA로 선정했다.

Vietnam Airlines names ECS Group as cargo GSA South Korea

Vietnam Airlines has named ECS Group as its cargo General Sales and Services Agent in South Korea, putting it in charge of representing the airline's freight business in one of its busiest international markets. Under the arrangement, ECS Group will take on a broad set of responsibilities – from sales and capacity management to operational supervision, digital services and customer support – covering both general freight and specialized cargo categories. ECS Group will support Vietnam Airlines' expansion plans regarding network and capacity between South Korea, Vietnam and onward destinations, by focusing on developing its cargo revenues and enhancing cargo customer service. ECS Group appointed Cargo GSA in Korea, to strengthen growth. Image: Vietnam Airlines South Korea is one of the three largest cargo markets in Vietnam Airlines' network, making it a significant player in the...

90 days to Splash Singapore

The countdown is on. With just 90 days to go, Splash Singapore is already shaping up to be one of the standout maritime gatherings of the year. Senior shipping figures, sharp market minds, tech trailblazers and influential decision-makers are being lined up for September 24 at the five-star Fairmont Hotel for a programme designed to deliver big ideas, bold debate and genuine commercial value. Co-founder Grant Rowles said the momentum is unmistakable. "We're hugely excited about where Splash Singapore is heading. We've assembled an incredible speaker lineup that we think will make this year's event truly unmissable," he said. In a market defined by volatility, shifting geopolitics, tightening regulation and the relentless push toward smarter, cleaner shipping, the need for sharp, informed conversation has never been greater. Splash Singapore is set to provide exactly that — a place where...

TIACA announces Singapore as Host City for Executive Summit 2027

TIACA has announced that its Executive Summit 2027 will take place in Singapore from 21-23 June, bringing together more than 350 air cargo executives and industry leaders from over 40 countries. The event will focus on key issues shaping the sector, including digital transformation, sustainability, e-commerce, infrastructure investment, regulation and emerging technologies. Following the success of the 2026 summit in Warsaw, the Singapore gathering is expected to attract senior decision-makers from across the global air cargo supply chain. The International Air Cargo Association (TIACA) is pleased to announce that its Executive Summit 2027 will take place in Singapore from June 21-23, 2027, bringing together senior executives, innovators, and decision-makers from across the global air cargo supply chain for three days of strategic discussions, industry insights, and high-level...

Low-cost barge model wins business for Medlog's Dhaka terminal

Medlog's Pangaon Inland Container Terminal Five months after taking over Bangladesh's underused Pangaon Inland Container Terminal, MSC's Medlog has attracted a growing roster of exporters and importers. It did it by offering significantly lower transport costs and avoiding chronic congestion on the Dhaka-Chittagong highway. Pangaon has long operated well below capacity despite its strategic location close to Dhaka, the country's main manufacturing and consumption hub. If Medlog can sustain the current growth, the terminal could become an important alternative gateway for Bangladesh's trade flows, reducing pressure on roads linking the capital with Chittagong port. According to Medlog Bangladesh MD ATM Anisul Millat, in just five months, the company has handled box volumes equivalent to what was processed in an entire year under earlier operators. "Some renowned buyers and mainline...

India boosts SAF: Countdown till Paris Air Show 2027

The seed for a close SAF collaboration was planted at a previous ILA. There, India's solar-power operated airport Cochin showcased a potential eSAF concept and an alternative to powering the facilities and buildings with fossil energy. Four years later, not much progress was made in the world regarding eSAF. India, however progressed in renewable energy deployment and expressed its interest to partner with like-minded players in the EU. To some extent, this collaborative intent was driven by German peers. At the recent Berlin-held air show ILA, the status of Sustainable Aviation Fuel in aviation, particularly cargo traffic, was one of the hottest topics discussed on and off stage. The Berlin Brandenburg Aerospace Alliance booth at Berlin's ILA aviation show – where SAF played a major role in panel discussions and expert talks – was extremely well-attended throughout the five-day event –...

CEVA Logistics advances Asia Pacific AI infrastructure, supports AirTrunk data centers in Australia, Malaysia

CEVA Logistics is supporting AirTrunk's latest hyperscale data centre developments in Sydney and Johor Bahru, providing end-to-end logistics services as demand for cloud computing and AI infrastructure grows across Asia-Pacific. The logistics provider is managing warehousing, transport, customs clearance and the movement of oversized equipment, including 45-ton generators and critical cooling systems. The partnership highlights the increasing role of specialised logistics in supporting large-scale digital infrastructure projects across the region. CEVA Logistics announces its strategic support of AirTrunk's latest hyperscale data centres in Sydney, Australia, and Johor Bahru, Malaysia. Positioned in key strategic locations, the data centres will support the infrastructure behind the growing demands of cloud and artificial intelligence (AI) infrastructure across the APAC region. Founded...
